RETURNİNG PAYMENTS
LİST API

Returning Payments – List API Document Versions		
Version 1.0	Document Created	18.06.2020

With this service, a transfer request has been made but you can access the list of returned payments due to the buyer account error. Returned payments are processed as a balance to a subaccount for your store. You can use the "Returning Payments - Send From Account" service to resend these returned payments.

1- To get the list of returned payments, send the information specified in the table to the URL related to POST: https://www.paytr.com/odeme/geri-donen-transfer

Mandatory	Description	Field name / type
✓	Merchant No: Merchant number given to you by PayTR	merchant_id (integer)
✓	Start date: Sample format: 2020-05-29 00:05:56	start_date (string)
	End date: Sample format: 2020-05-29 23:59:10	end_date (string)
✓	PayTR Token: The value you create to make sure that the request comes from you and that the content has not changed (See sample code for calculation)	paytr_token (string)

2- Your request will be returned in JSON format.
   a. If there is no bounce payment within the specified date range, the status value returns **failed**.
   b. If there is any bounce payment within the specified date range, the status value **success** and the information in the table below will be returned.
   c. If you have an error in the query, the status value returns an **error**. In this case, you should check the **err_msg** content for the error detail.

Other information returned in the status **success** status is detailed in the table below.

Description	Field name / type	Values
